WORK EXPERIENCE

Web Developer Intern *July 2021- September 2021*
Global One Enterprise Mumbai,India

— Created a user-friendly front-end with React.js and integrated a back-end with APIs and database support for end-to-end data processing and management.
— Crafting tailored **landing pages to match specific promotions** and discount opportunities.
— The implementation of tailored discount landing pages led to a substantial **40 percent boost in sales**.

Web Developer Intern *October 2020- April 2021*
Pankhuri.co Bangalore,India

— Creating dedicated landing pages **optimized for direct purchase transactions.**
— **Designing an engaging, user-friendly frontend** while offering expert client support for technical challenges and inquiries.
— Efficiently preparing data for analysis by identifying and removing duplicates, filtering out missing values, and organizing the dataset systematically.

PROJECTS

Be Beauty React, Nodejs

Established Be Beauty, an innovative platform designed to empower users by enabling them to effortlessly explore and schedule appointments at Be Beauty Salon

Implemented strong authentication measures to protect user data and ensure a secure login process, along with an intuitive scheduling management feature for efficient task organization.

EcoDrops Reactjs, Nodejs, Mysql

Ecodrops is a web-based tool integrating IoT sensors and scheduling for user-friendly water supply management, ensuring control at your fingertips.

Ecodrops streamlines water supply management by harnessing state-of-the-art components like the ESP32 processor, water sensor module, flow sensor, and Ultrasonic sensor. Advanced scheduling, it provides efficient control and speed management, ensuring a seamless water supply experience.
